

## Are we all just accidents of evolution?

We know when we see a beautiful painting that it has been created with skill and intelligence. It's too well done to be an accident. A watch or a mobile phone are also so obviously planned and made.

So why should we think complex and beautiful creatures, like butterflies and especially human beings, happened by chance, without an intelligent designer? Such thinking doesn't make sense of the evidence.

## We were created!

Every plant and animal, even down to the simplest micro-organism (which are actually phenomenally complex), declares, "A powerful and intelligent God made me!"

"God's invisible qualities – his eternal power and divine nature – have been clearly seen, being understood from what has been made, so that people are without excuse"  
(Romans 1:20)

*God created you!*

## Do we owe our Creator anything?

God loves us as creatures whom he carefully made, and wants only good for our lives – even for us to know and enjoy him personally. So we owe him our very existence, in fact even our praise and worship.

We praise and honour our various heroes and stars for their achievements. Yet will we ignore the awesome, loving God to whom we owe everything?

## What can we do?

We could stop ignoring our Creator and living as if we were in charge of our lives, and instead praise him and let him rule us by his good commands, found in the Bible.

God is so kind, and promises to forgive our past rejection of him, if we humbly seek it through his Son, the Lord Jesus Christ. Jesus died on the cross, taking the penalty we deserve for our rebellion against the Creator. He was even raised from the dead, to give everlasting life to all who come to God through him. Will you come?

*You can know and enjoy your Creator for ever,  
through faith in Jesus Christ!*
